You won’t want to miss the excitement of spring migration in the North Carolina Piedmont and the 2017 Carolina Bird Club meeting in Winston-Salem, NC on April 28-29. Field-trips include a variety of piedmont and pre-mountain habitats in and around Winston-Salem and Greensboro and the Blue Ridge Parkway, including many on the NC Birding Trail, as well as Pilot Mountain, which is designated as an Important Bird Area.

We will be based at the Hawthorne Inn & Conference Center in Winston-Salem. The conference center has a 3-Diamond AAA rating, is NC Green Travel Certified and features free parking, business center and fitness center. The Bayberry Bistro on site specializes in American cuisine and serves breakfast, lunch, dinner and room service; guests can also have a drink at the bar. The Hawthorne Inn is conveniently located close to interesting downtown dining and cultural attractions for birders and their non-birding companions alike.

Rooms at the Hawthorne Inn & Conference Center may be booked by calling (800) 972-3774 and asking for a room in the Carolina Bird Club block. Room rates are $95 per night (excluding NC state tax of 6.75% and occupancy tax of 6%) and include a complimentary hot breakfast. Please remember that reservations made after March 4, 2017 are subject to space availability. All the rooms feature a microwave, refrigerator, coffeemaker, free WiFi and hairdryer.

We will have sessions both Friday and Saturday evenings (cash bar available both nights). Saturday evening will feature a buffet dinner at the Hawthorne Inn & Conference Center followed by a program and CBC general meeting. The buffet is priced at $28 per person. Joan Collins will be our featured speaker on Saturday evening. A passionate birder and ear-birder, Joan is a writer and speaker on ornithology topics for many organizations and programs, a New York State licensed bird guide and owner of Adirondack Avian Expeditions. She is active in conservation and climate change work with a special love for the Bicknell’s Thrush and Gray Jay. On Friday evening Will Scott, with the Yadkin Riverkeeper, will join us to discuss their activities to promote and protect the Yadkin Pee Dee River Basin and clean water. The Yadkin River is the principal hydrological artery of central NC, now threatened as many of our rivers are, by industrial pollution and poor management.

Please join us for another memorable CBC meeting!
I am honored for the opportunity to serve as President of the Carolina Bird Club. My association with the dedicated and hardworking Executive Committee has made my task most rewarding. Each member of the Executive Committee has gone beyond what was necessary to help manage and improve our Club. I’ve also benefitted personally from my experience as President for it has given me the opportunity to meet numerous birders from across the Carolinas. I have come away with a heightened admiration and respect for the many fine folks that represent our birding community.

One area of focus over the past two years has been the continued support of our Carolina young birders. With the help of member donations, the Executive Committee created a youth scholarship program and additional support to enable young birders the opportunities to expand their knowledge of birds through meaningful learning experiences, such as workshops and birding camps. These are worthy efforts, and I especially appreciate our young birders active participation in our seasonal meetings. They bring much vitality to the Carolina Bird Club and represent our future conservation leaders. My association with them has been one of my more pleasant experiences as President.

In addition, the Executive Committee has strived to be a good steward of our club’s resources through long-range planning. As another priority we have worked to improve membership services by offering high quality field trips, guest speakers and workshops at our seasonal meetings, along with the continuation of our popular bonus trips. In the area of conservation, our grants program continues to support meaningful research projects in the Carolinas and we have stepped up our efforts to build relationships with local conservation leaders and organizations. Additionally, I am very proud of our website and newsletter, which provides important timely information and educational resources to our members. As another priority, the Executive Committee has made it their goal to support the scientific integrity of our Club. I’ve been very pleased with the high degree of professionalism exhibited by our two Bird Records Committees and with the high quality of our scientific journal publication The Chat.

In a broader sense, the Executive Committee has tried to foster an atmosphere of welcoming fellowship at our seasonal meetings combined with fine birding experiences. The planning and organizing of our seasonal meetings requires much work, and our Club has benefitted greatly from the volunteer efforts of members, which I greatly appreciate. If you have never attended a seasonal meeting, I invite you to do so. In my admittedly biased opinion, the Carolinas, from the mountains to the sea, provides some of the best birding anywhere in North America. Our seasonal meetings connect our members with the finest resources the Carolinas have to offer, through shared experiences for seasoned and beginning birders alike. That is the way birding should be. Again, I want to thank all of you for your current and future support, and I look forward to seeing each of you soon!

Sincerely,
Irvin Pitts

Essential Planning Notes for the Winston-Salem Meeting!

Friday, April 14th is the last date you can cancel and receive a refund of your registration fee and banquet charge.

If you have to cancel after the refund cutoff date, please notify the Headquarters Secretary so we can give your field trip space to someone on the waiting list.

- All field trips have a limit of 14 participants. Status of the field trips will be posted on the web page.
- Plan to bring water, snacks and lunch for the all day trips since there will probably not be food available along the route. There are fast food options near the hotel so you can purchase takeout for lunch the night before.
- Water and snacks are a good idea for the half-day field trips. The schedule is tight so you may want to have a cooler with lunch in your room as an alternative to the fast food available nearby. All rooms have refrigerators.
- All trips will leave from the hotel at the times indicated on the schedule. If you prefer to meet the group at the site, be sure to inform the leader and make a notation on the field trip attendee list so the leader will not be looking for you at the hotel.

Spring Meeting Field Trip Descriptions—Half Day

Trips 8, 18, 33, 43: Tanglewood Country Park (Half Day)
(NC Birding Trail – Northwest Piedmont Group, ebird hot spot) This beautiful park of over 1000 acres along the Yadkin River features varied habitats and year-round bird viewing opportunities. We will likely be birding from the car as well as hiking on trails and service roads to cover native grass meadow, oak forest, mixed hardwoods/pine forest, early successional, mesic forest habitat and the wetlands viewing platform. We will bird through the Manor House, golf course, cemetery, horse track, stables and picnic areas and a portion of the Yadkin River Trail, developed in partnership between the Forsyth Audubon Society. The diversity of habitat supports a wide variety of birds. Watch for Red-headed (although these are becoming harder to see) and Pileated Woodpeckers, Wood Ducks, Cliff Swallows, and nesting Baltimore Orioles. Expect Indigo Buntings, Green Heron, Eastern Kingbird, Blue Grosbeak, flycatchers and several species of warblers, including nesting Prothonotary Warblers. Trails are well maintained and fairly easy walking. There is a $2 per car entrance fee. Restrooms are available. Approximate Travel Time: 15 min.

Trips 9, 19, 34, 44: Reynolda Gardens (Half Day)
(NC Birding Trail – Northwest Piedmont Group, ebird hot spot) The grounds and trails around the 129-acre former R. J. Reynolds estate are in the heart of Winston-Salem adjacent to and owned by Wake Forest University. This is known by the locals to be one of the best birding destinations in town. Every warbler, thrush and vireo on the county list has been observed here. The sun reaches the abundant tall trees early, which become alive with warblers, vireos, orioles, tanagers and grosbeaks. The woodland walking trails through oak forest and mixed hardwoods and pine offer possibilities to see cuckoos, woodpeckers, flycatchers and thrushes, while the marsh and native grass meadows can produce Spotted and Solitary Sandpipers, Cedar Waxwings, Red-winged Blackbirds warblers and raptors. If you’re not a hard-core birder or just want to take a break, this field trip provides some alternatives for an enjoyable outing. The grounds include formal gardens, a plant shop and the Reynolda House Museum of Art. The adjacent Reynolda Village has several shops and restaurants. Trails are well-maintained and fairly easy walking, although sections may be hilly. Approximate Travel Time: 10 min.

If you want to see the birds, enjoy lunch at one of the restaurants and check out the gardens, plant shop and museum, sign up for a morning trip and stay all day. Just let the leader know and drive separately or carpool with someone whose schedule coincides with yours. There is a $14 fee for the Reynolda House Museum of Art and for house tours. Restrooms are available.
Trips 10, 20, 35, 45: Historic Bethabara Park (Half Day)

(NC Birding Trail – Northwest Piedmont Group, ebird hot spot) Birds flock to this unique setting. A National Landmark, this site is where the first group of Moravians settled in 1753. We can stroll through the original village with its palisade fence and numerous archeological excavations, but our primary focus will be the 20-mile system of nature trails that traverse a 183-acre wildlife preserve that includes a wetlands area with a boardwalk. Spring brings vireos, Blue Grosbeaks, a variety of warblers and both Summer and Scarlet Tanagers. Nesting species include Yellow-billed Cuckoo, Blue-gray Gnatchasers, Brown Thrashers and Wood Thrush. We should also be on the look-out for Barred Owl, woodpeckers, thrushes, warblers, Tree Swallows, Wood Duck, Red-shouldered Hawk, herons and flycatchers. Trails are well-maintained and fairly easy walking. Approximate Travel Time: 10 min.

Trip 11: Miller Park & Archie Elledge Treatment Plant (Half Day)

(Miller Park is on NC Birding Trail – Northwest Piedmont Group, ebird hot spots) We will combine two venues for a nice variety of birds. The entire site of Archie Elledge Sewage Treatment Plant can be productive, including the fields and brush areas that attract Blue Grosbeak, Indigo Bunting, and Song and Field Sparrows. A short drive will take us to a very different habitat at Miller Park, which is right in town and popular with birders and non-birders alike. The activity at the playgrounds, ball fields, tennis courts, picnic shelters and community center doesn’t seem to bother the birds in the adjacent woods. The compact network of paved trails provides close views of birds in a mix of hardwoods, stands of pine, wildflowers and a living stream. Thrushes hop across the paths, and flycatchers, vireos, warblers, tanagers and orioles flit about the trees. There is a good chance of seeing nesting Yellow-crowned Night-Heron, Barred Owls, Cooper’s and Red-shouldered Hawks. Restrooms are available at Miller Park, but not at the treatment plant. Trails are well-maintained and fairly easy walking. Approximate Travel Time: 10 min.

Trips 12, 36: Hamilton Lakes Park & Bog Garden (Half Day)

(Bog Garden is on NC Birding Trail – Central Piedmont Group, ebird hot spots) Hamilton Lakes Park is a 60-acre wooded park located in a Greensboro residential neighborhood and is one of the best places in Guilford county to see neotropical migrants in the spring. Nearly every warbler species in eastern North America has been seen here, along with woodpeckers, migrating thrushes and breeding raptors.

There are no public facilities in this privately owned park. Birders must be especially cautious about being good guests because parking is limited and it is heavily used by neighborhood residents.

The Bog Garden is a small wetland embedded in a residential section of Greensboro and features floodplain forest, lake and small wetland habitat traversed by a boardwalk. Mallard and Wood Duck are year-round residents. Spring migration attracts thrushes, flycatchers and wood warblers. Brown-headed Nuthatch and Eastern Screech Owl are known to nest here. If time permits, we may check out the Bicentennial Garden, a formal garden with paved and mulched walkways through shrubs, mature pines and open garden areas, just 100 yards north of the Bog Garden. Rest rooms will be available at gas stations and convenience stores near the sites. Trails are well-maintained and fairly easy walking. Approximate Travel Time: 30 min.

Trip 13 Northeast Park/Baldwin-Sockwell Road (Half Day)

Located near Gibsonville, this 374-acre park offers a wide variety of outdoor experiences, including an aquatic center, hiking, biking and equestrian trails, athletic fields, picnic shelters, playgrounds and over 10 miles of trails. We will walk the Buffalo Creek Trail and on the Reedy Fork trail through bottomland forest and near the creek. Participants should expect to walk quite a lot. Sections of the trails are hilly; participants should wear sturdy walking shoes and bring drinking water. Restrooms in the park. Approximate Travel Time: 50 min.
Spring Meeting Field Trip Descriptions—Half Day

Trips 14, 22: Piedmont Environmental Center and Greenway (Half Day)
(NC Birding Trail – Central Piedmont Group, ebird hot spot) This 376-acre site features over 11 miles of trails that provide a variety of options for birders, including oak forest and mixed hardwoods / pine, early successional, small wetland and lake habitats. Species of interest include migrating warblers and other passerines, ducks, Eastern Whip-poor-will, Great Horned Owl and nesting Red-Headed Woodpecker. The Center is the southern terminus of the Guilford Country Bicentennial Greenway that provides additional birding opportunities. Restrooms are available at the main building. Trails are well-maintained and fairly easy walking, although there may be sections that are hilly. Approximate Travel Time: 30 min.

Trips 21, 37: Civitan Park, Salem Creek Greenway & Salem Lake (Half Day)
(NC Birding Trail – Northwest Piedmont Group, ebird hot spot) Civitan Park and the Salem Creek Greenway comprise a restoration area with a greenway that runs parallel to and between a five-acre wetland and Salem Creek. This small city park is adjacent to Winston-Salem State University and is home to such species as Green Heron, Yellow Warbler, Blue Grosbeak, Red-winged Blackbird and Orchard Oriole, and supports a variety of spring migrants. It is the only known nesting site in the county for Willow Flycatchers and Warbling Vireos. This park also has a nice variety of wildflowers. If time permits, we will go by Salem Lake, a 365-acre reservoir that is Forsyth County’s largest body of water, to look for lingering waterfowl. An unpaved trail encircles the entire lake. A few minutes here could net a few more songbird species since the shore is wooded and attracts migrants. Restrooms at Salem Lake marina. Trails are well-maintained and fairly easy walking. Approximate Travel Time: 10 min.

Trip 23: Sanders Ridge Vineyard & Big Woods Restaurant (Half Day)
(NC Birding Trail – Northwest Piedmont Group, ebird hot spot) This trip is ideal for birders and non-birders alike. This 150-acre site set in the Yadkin County countryside has been in the same family for five generations. There are many good birding areas, including the open spaces in and around the 15-acre vineyard, as well as two woodland, marsh, lake and stream trails. We can expect to find a variety of species, including migrating passerines, woodpeckers, flycatchers, herons and Wood Duck. The grounds are known for the butterflies and wildflowers as well as birds. Trails are well-maintained and fairly easy walking. Approximate Travel Time: 30 min.

Non-birders may enjoy taking a winery tour refining their palates by participating in a wine-tasting session. The Big Woods Restaurant serves dinner in a beautiful setting beginning at 5:30 PM, so you may want to consider having your Friday dinner here (reservations are required). Restrooms are available when the restaurant opens around midday.

Trips 38, 47: Price Park (Half Day)
(ebird hot spot) This 1.5 mile trail was created in 1997 and covers open pasture, creek, pond and hardwood forest habitats. With over 150 species identified, the area attracts migrating and breeding woodland songbirds, grassland birds, waterfowl such as herons and kingfishers and Red-tailed and Red-shouldered Hawks. The trail also features wildflowers. Restrooms in nearby gas stations and convenience stores. Trails are well-maintained and fairly easy walking. Approximate Travel Time: 30 min.
Trips 39, 48: Chinqua-Penn Walking Trail (Half Day)

(NC Birding Trail – Rockingham County Group, ebird hot spot) This 1.5 mile trail was created in 1997 and covers open pasture, creek, pond and hardwood forest habitats. With over 150 species identified, the area attracts migrating and breeding woodland songbirds, grassland birds, waterfowl such as herons and kingfishers and Red-tailed and Red-shouldered Hawks. The trail also features wildflowers.

Approximate Travel Time: 45 min.

Trip 46: Washington Park & Salem Creek Greenway (Half Day)

(Greenway is on the NC Birding Trail – Northwest Piedmont Group, both are ebird hot spots) Washington Park is the largest neighborhood park in Winston-Salem and encompasses athletic fields, a dog park, a section of Salem Creek Greenway and trails through vast natural areas. This park provides an excellent place to inventory the migration. Driving or walking around the “upper park” is a good spot for Blackburnian, Bay-breasted, Blue-winged and Hooded Warblers, Scarlet Tanagers, Blue-headed Vireos, all five thrushes – just about anything can show up here. The trail along the creek can be good for Yellow Warblers, Yellow-breasted Chat and Yellow-crowned Night-Heron and maybe Acadian and Willow Flycatchers. Be prepared to walk on sidewalks and trails that are somewhat hilly, but not too strenuous. There is a Port-A-John at Washington Park.

Approximate Travel Time: 15 min.

Trips 1, 26: Blue Ridge Parkway South (All Day)

(NC Birding Trail – Northern Blue Ridge Parkway Group, ebird hot spot) Our route is along NC Hwy 21 up the escarpment through Roaring Gap to the Blue Ridge Parkway. A stop at Little Glade Mill Pond at milepost 230 should yield tanagers, orioles and warblers in the hardwoods on either side of the parkway. The next stop is Mahogany Rock where hummingbirds, Indigo Bunting, Chestnut-sided, Black-throated Green and Black-throated Blue Warblers, Common Yellowthroat and Yellow-breasted Chat are sometimes found. Grassy fields at the Bluffs Lodge sometimes harbor Grasshopper Sparrows and Horned Larks. If time permits, we will stop at Basin Creek at the south side of Doughton Park and look for Hooded and Worm-eating Warblers, Waterthrushes, redstarts, thrushes and Acadian Flycatchers. The fields along Longbottom Road are good for hawks, Wild Turkey, Eastern Kingbird and Tree Swallow. Bring snacks, water and lunch for this full day outing. There are restrooms at Doughton Park and limited toilet facilities elsewhere.

Approximate Travel Time: 1 hour.

Trips 2, 27: Stone Mountain State Park, Blue Ridge Parkway, Doughton Park (All Day)

(NC Birding Trail – Northern Blue Ridge Parkway Group, ebird hot spot) This trip takes us to several different areas, giving us opportunities for a long list of species. First we’ll drive through Stone Mountain State Park, with brief stops for warblers. Louisiana Waterthrush and Swainson’s Warbler are possibilities here. Next we’ll pass through Wilkes County fields where we will watch for Wild Turkey and Tree Swallows. From there, our route will take us along Long Bottom Road where we will stop to bird Basin Creek for Acadian Flycatchers and several species of warblers, including Northern Parula, Louisiana and Northern Waterthrush, Black-throated Green, Black-throated Blue, Yellow-throated, Black and White, Worm-eating and American Redstart. After ascending the escarpment on Hwy 18, we’ll take the Parkway north to the upper end of Doughton Park, stopping at overlooks and Mahogany Rock, for Common Ravens, Ruby-throated Hummingbirds, Chestnut-sided Warblers and possibly Red-breasted Nuthatches. On our return to Winston-Salem along Hwy 21 through Roaring Gap, we’ll make a brief stop to check the lakes for Wood Ducks and late migrant waterfowl. Bring snacks, water and lunch for this full day outing. Restrooms are available at Doughton Park and at convenience stores and gas stations along the route.

Approximate Travel Time: 1 hour.
**Spring Meeting Field Trip Descriptions—All Day**

**Trips 3, 28: Hanging Rock State Park & Surrounding Area (All Day)**
*(NC Birding Trail – Northwest Piedmont Group, ebird hot spot)*

Hanging Rock State Park offers sheer cliffs and peaks of bare rock, quiet forests and cascading waterfalls and views of the piedmont plateau that stretch for miles. Peregrine Falcon and Common Raven can be seen performing aerial acrobatics during courtship. Listen for Black-throated Green Warblers, Worm-eating Warblers and Hooded Warblers along any number of the trails including the short trails to the five waterfalls in the park. The mountain laurel and rhododendron make this area especially beautiful in the spring. Although there are several strenuous trails in the park, we will be on trails that are moderate to easy. Bring snacks, water and lunch for this full day outing. Restrooms are available in the park. **Approximate Travel Time: 1 hour.**

**Trips 4, 29: Pilot Mountain State Park (All Day)**
*(NC Birding Trail – Northwest Piedmont Group, ebird hot spot)*

Pilot Mountain rises more than 1400 feet above the rolling countryside of the upper Piedmont as you approach the park. The Park offers hiking trails through a variety of habitats. The mountain section is forested in northern piedmont mixed hardwoods/pine, culminating in a quartzite monadnock at the summit while one of the most scenic stretches of the Yadkin River flows through the lower elevations. A 6.5-mile woodland corridor links the two sections. A wide variety of species associated with water may be seen in the river section, including Bald Eagle, Snowy Egret, Green Heron and migrating raptors. We can expect to see a wide variety of migrating passerines (including warblers, tanagers, grosbeaks and thrushes), along with woodpeckers and sparrows and other grassland species. Bring snacks, water and lunch for this full day outing. Restrooms are available in the park. Participants should expect to walk quite a bit; sections of the trails may be hilly. **Approximate Travel Time: 30 min.**

**Trip 5: North Carolina Zoological Park (All Day)**
*(NC Birding Trail – Uwharrie Group, ebird hot spot)*

In addition to the exotic birds of the R.J. Reynolds Forest Aviary, the open spaces of the 1500-acre NC Zoo offer both understory and tree canopy of oak forest and mixed hardwood / pine, small wetlands and lake habitats where we can find a wide variety of migrating passerines, native ducks and wading birds. Purgatory Mountain Trail begins at the north end of the North America Region parking lot and extends a mile to the top of scenic Purgatory Mountain. According to the most popular Randolph County legend, Purgatory Mountain gained its name during U.S. Prohibition era when there were so many whiskey stills built on the mountain that their fires lit up at night like "purgatory." Purgatory Mountain is the highest point in the Zoo and part of the Uwharrie Mountain range, thought by geologists to be the oldest in North America. Here the biologically significant forests change from an oak hickory to a high-elevation chestnut forest at the top of the mountain. There is a $13 per person entry fee to enter the Zoo (to be paid at the Zoo). We will enjoy a brief tour of the Valerie H. Schindler Wildlife Rehabilitation Center, which provides free veterinary care to sick, injured and orphaned native wildlife. After our tour, we will walk through the Zoo grounds as birders.

In the afternoon, for those interested and if we have time, we will continue to Uwharrie National Forest – Birkhead Wilderness Area or Densons Creek Nature Trail. Both offer walks through a mixed hardwoods and pine forest, with successional grassland (Birkhead), floodplain forest and creek habitat (Densons Creek) as well. Trails are fairly easy to walk. Participants should expect to walk quite a bit. Sections of the trail may be hilly. Restrooms are available in both locations. **Approximate Travel Time: 1 hour, 15 min.**

A short business meeting will be held at the CBC Spring Seasonal Meeting in Winston-Salem, North Carolina, the weekend of April 28-29, 2017.

Two items of business that require a membership vote for approval will be discussed. First, it’s that time of year to elect our incoming officers to serve on the CBC Executive Committee. The CBC Nominating Committee recommends the following slate of nominees for consideration:

- **President** - Christine Stoughton-Root, Merritt, NC (first one-year term)
- **Eastern NC Vice President** - Sherry Lane, Wilmington, NC (previously appointed and now eligible for a three-year term)
- **Treasurer** - Paul Dayer, Durham, NC (first one-year term)
- **Secretary** - Jeri Smart, Rolesville, NC (first one-year term)
- **Western NC Member at Large** - Marilyn Westphal, Hendersonville, NC (first two-year term)
- **Eastern NC Member at Large** - Lester Coble, Goldsboro, NC (first two-year term)
- **Eastern NC Member at Large** - Katherine Higgins, Wilmington, NC (first two-year term)
- **SC Member at Large** - Steve McInnis, Columbia, SC (second two-year term)

As a second item of business, a membership vote will be taken on a proposed dues increase. In 2016, the CBC Executive Committee voted to recommend an annual dues increase of $5 to individual and family memberships. Enactment of this increase requires a membership vote. A notice of proposed increase was first advertised in the December 2016 CBC Newsletter and members are encouraged to read the article for more detailed information. This increase will help the Club maintain its current high level of programs and services offered to members.

The recommended dues schedule to be approved:

- **Individual or nonprofit**: $30
  - **Family**: $35
  - **Student**: $15
  - **Patron**: $50
  - **Business**: $30
- **Associate Life Membership**: $100
- **Life Membership**: $500
Spring 2017 Winston-Salem, NC Registration Form

Name(s)__________________________

Meeting registration at the door costs $40.
Total Enclosed = $

Club policy requires all field trip participants to comply with the field trip leader’s assessment and requests concerning the physical ability of each participant to make or complete the trip.

I will release and discharge (and will not make a claim against) the Carolina Bird Club for injury, death, or property damage arising from my participation at this meeting and/or Club field trips. This release of liability is entered into on behalf of all members of my family, including all minors accompanying me. I certify that I am the parent or legal guardian of any such minors and that I am over 18 years of age.

Make check payable to Carolina Bird Club and send it to: CBC, 9 Quincy Place, Pinehurst, NC 28374

Before sending this form, check the website at www.carolinabirdclub.org to see if any of your trips are full, rescheduled or cancelled. Processing of mail-in registrations will not begin until one day after online registration opens.

Cancel by contacting the Headquarters Secretary at hq@carolinabirdclub.org.
• Cancellations for the meeting will be refunded if received by Friday, April 14, 2017.
• If you need to cancel after the refund cutoff date, please notify the Headquarters Secretary so we can give your field trip space to someone on the waiting list.
